Learner - Certificates

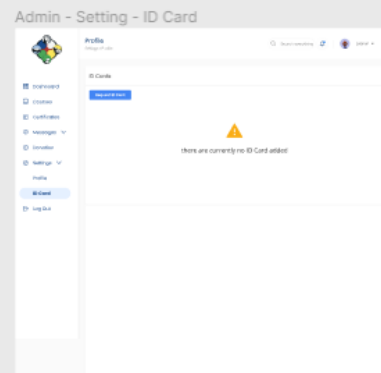

I have a question regarding this, as the client mentioned there will be different Certificates and Letters for each course. Then why we just seeing the one Certificate, and I am able to see a tab-cell which shows to see the Letter but you forgot to show that how a user will be able to see different Certificates.

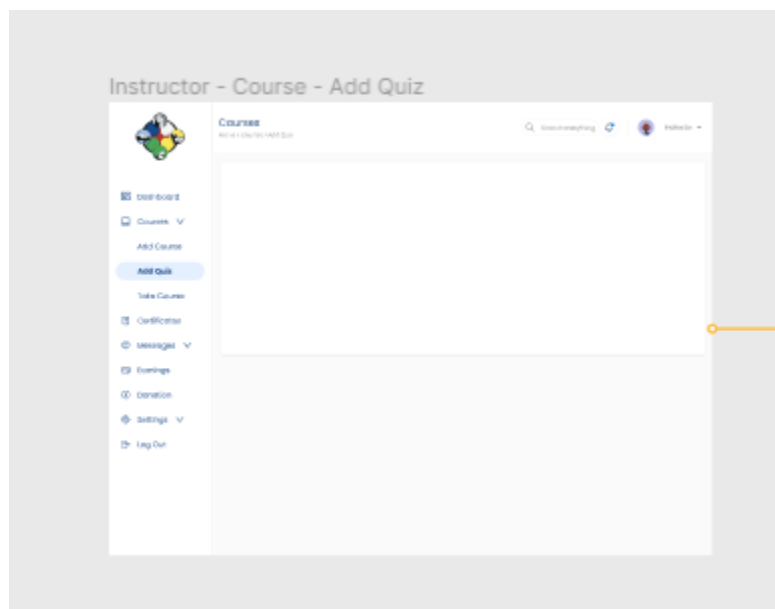

While we are at Donation> History but in the left-side bar it shows we are at Send – Correct it.

Learner

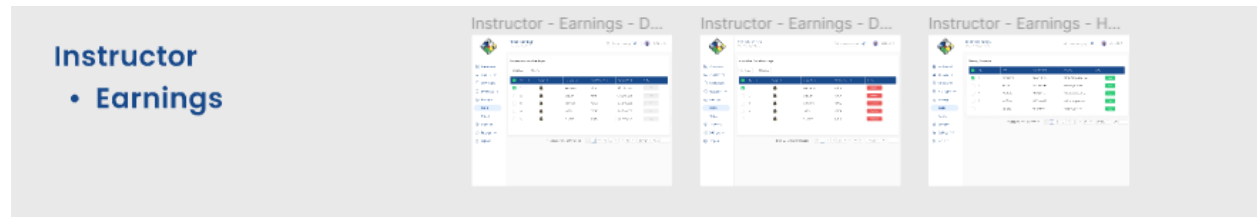

- ID Card

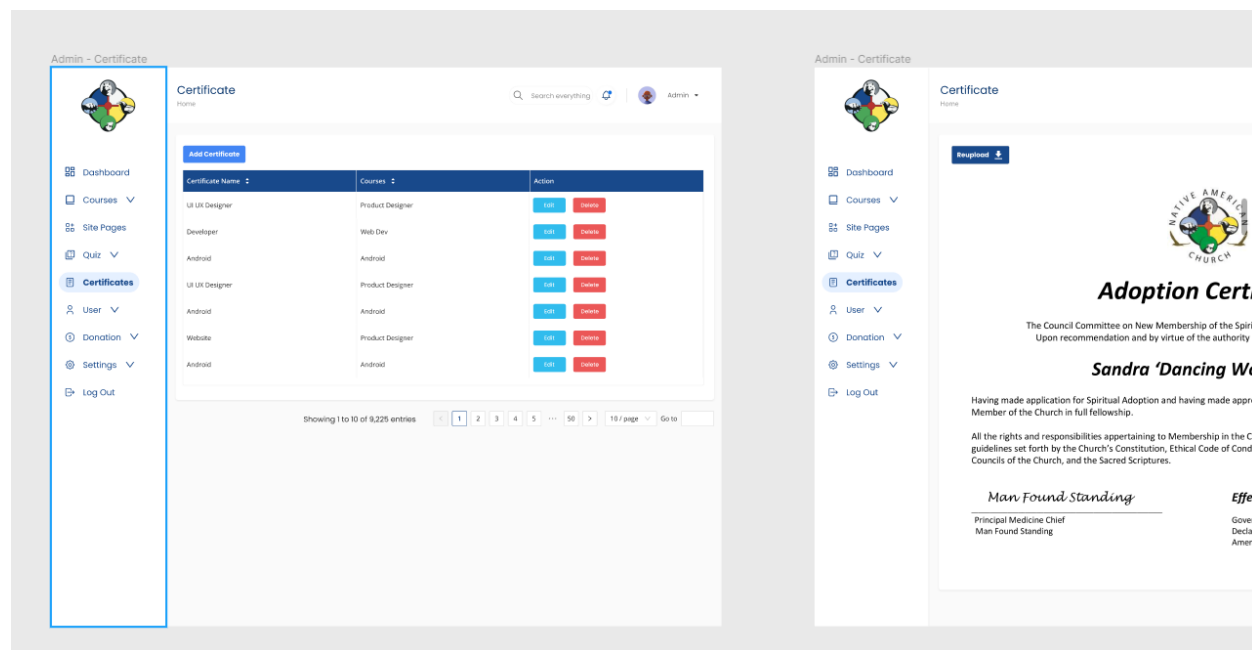

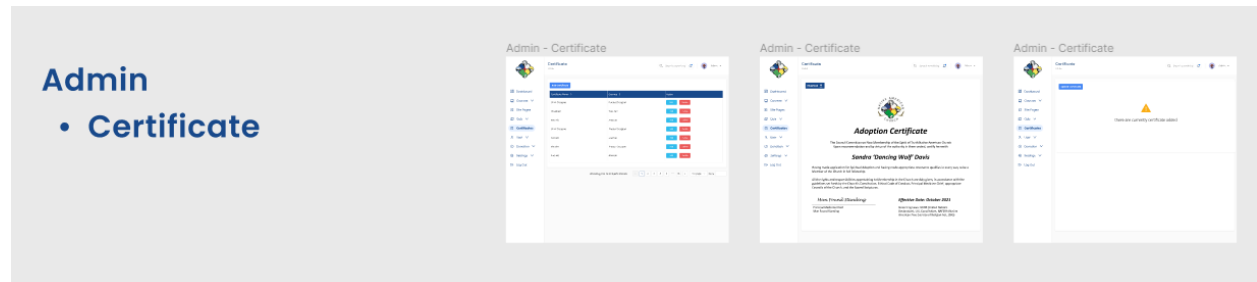

Why is there a Request ID Card option, when the client says that there will be only one ID card, and the card card will be there to just Print off/ or maybe download.

Why is there a blank screen on – Instructor – Course - Add Quiz

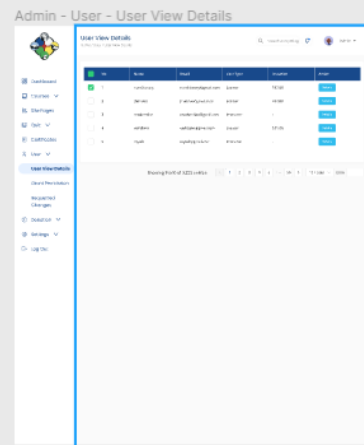

I am not able to find the same Earning section for the admin – is there any reason for it?

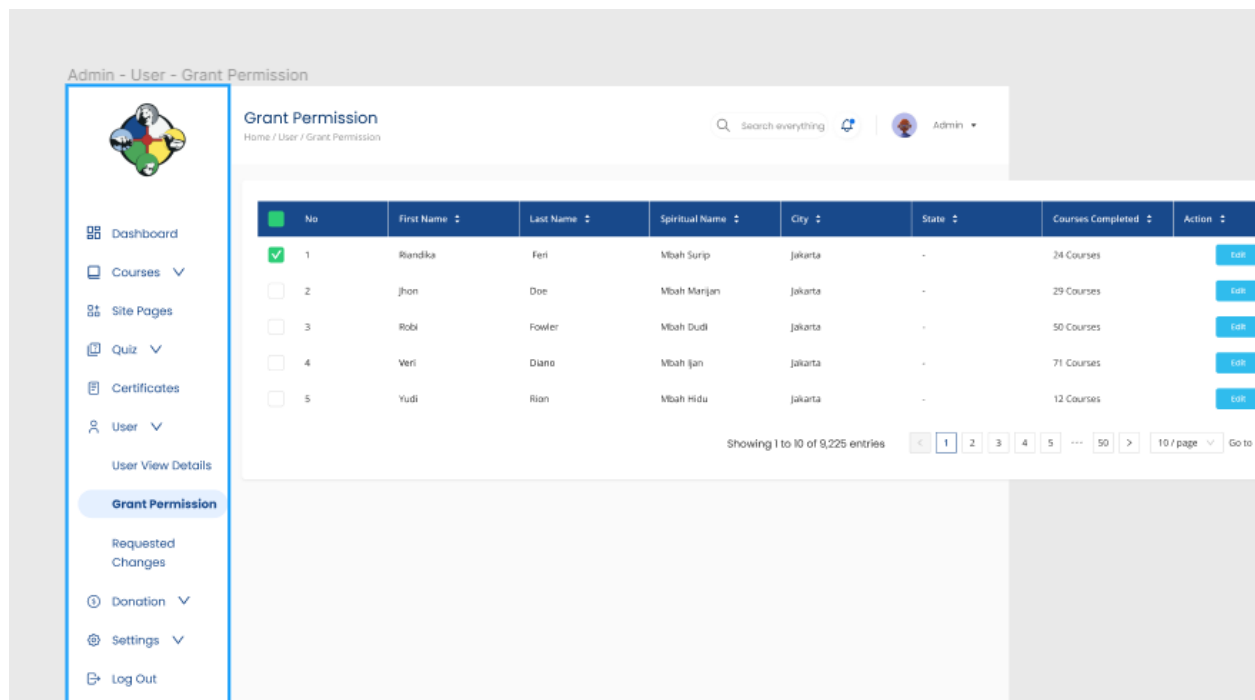

What will happen after admin clicks on Add Certificate? As client suggested before there will be a way to customize and add both The Certificate and Letter for each course. How are we managing that?

Admin

- User View details

If this is a user view detail area, how we are going to find the users? Such as there should have to be Filters. Please have a look at it.

Same with this how we going to find a specific member to change it's user type. WE need to have search or filters for that.

● Yes, having members not being able to access courses until they have completed the prerequisite courses is something we wanted from the beginning. It would be very confusing for the members if they do not know the basic information before we move them on to advanced concepts. So, let me explain a little more . . .

Before doing the Sacred Way Course, a person must do the following:

1. Take the free courses of the Constitution, Ethical Code, Native American Religious Freedom, The Healing Way, and Doctrine of the Wheel
- a. Then they can donate and take the Medicine Wheel Course
1. After the Medicine Wheel Course, they can take the Bundle Ceremony Course

Now once they have finished the Sacred Way Course, they get their certificate and letter for that course.

It is only when they have finished the Sacred Way Course can they move on to the Medicine Apprentice Course. (This will have them take more courses, free and donation-based courses.) Once they finish the Medicine Apprentice Courses they can then move on to the more advanced course of Medicine Person Course. (Again this will have them take more courses.) Once they have finished the Medicine Person Course, they can then go into even more advanced like The Peyote Way.

Now over time more courses may be added or deleted out. We will want to be able to add (or take away) more required courses to different study assignments.

So a new person becomes a Member (they pay, agree to our terms, and put in their personal information). From there they take courses and get certificates for the courses they complete. Now the courses will be in a set order --- take course 1 before 2 and 2 before 3. Down the road we will be adding more courses so we will need to be able to change the course order --- Example: Take course 1 before course 2 and then course 2A (the new course we added) before course 3 and so forth.

Pre – Requisite Courses – Please look at image below the Card is already created in Trello.

Prerequisite - a thing that is required as a prior condition for something else to happen or exist.

Client has mentioned it already, he wanted it from beginning. When a member want to take a course and there is a prerequisite for it, he will not be able to take that and a pop up will show that you will have to take this course before taking the one that you are selecting.

The question is how we going to set it. Like right now Admin/Instructor add course but do not set prerequisite, how the platform will know which course is set prerequisite of which course?

The things will not be exactly like it how I explained but there will be different ways of prerequisite things as client suggested, such as you have to donate before taking this course, or you have to finish the course before taking it, etc.

We will also have to set orders of courses, so users will take the course in order.

The question is we don't have any area to set them or anything like what I said above.

Customer has explained it please look at the above photo or the Trello card.
